

PIONEER

WATER TANKS

Fire Protection Tank

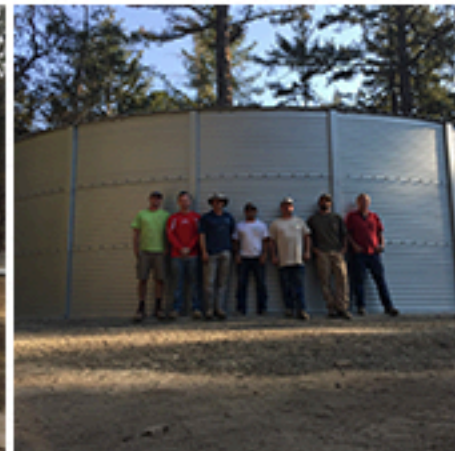

WaterMark H2O

Watermark H2O Rainwater Harvesting installed this XL 50/03 Pioneer Water Tank on a cement ring beam. The water storage system has a 41-feet 8-inch diameter and a 10-feet 7-inch wall height.

The commercial water system has additional valves and nozzles, including fire connections.

The system provides enough water capacity for the property's daily usage as well as acts as a backup water supply in case of emergencies. The fire connections make the water easily accessible.
